A new platform for the Dutch electrical engineering and lighting sector

The electrical engineering sector is more dynamic than ever; new products, new technologies and new applications follow each other up at lightning speed. With that in mind, a clear overview and efficient information become increasingly important.

That is why the electrical engineering sector deserves an innovative platform where manufacturers, importers, agents and wholesalers can present their product and service portfolio. A platform where installers, architects and end users are able to inform you efficiently about the latest products and developments live and online.

We are going to market this new platform under the name LED + Elektrotechniek. Its core is a trade fair 3.0 in which the power of human contact is reinforced and substantiated by targeted market and marketing data; this online platform will be available for 365 days a year.

LED + Elektrotechniek stems from the successful trade fair Led + Elektro, which has already seen six editions. LED + Elektrotechniek, however, is bigger and broader with a **minimum of 120 exhibitors, 14,000 m2 gross stand area and at least 9,000 installers, architects, wholesalers and other professionals** who visit the fair during 2 days in November. And an online platform where you are visible for 365 days and where you can post new products, videos, job offers and news items.

Exhibit at LED + Elektrotechniek, reach your target groups and generate valuable leads. Prominent companies precede you, *be part of the future!*

LED + Elektrotechniek

Brabanthallen, hall 6 and 7

Wednesday 3 & Thursday 4 November 2021

A trade fair for the 21st century

A trade fair is the **most powerful tool** for generating leads, launching new products and maintaining existing relationships.

But that does require **a trade fair of the 21st century**. Standalone fairs with large mega-expensive stands and no online presence give a low return on a high investment. That is definitely a thing of the past, LED + Elektrotechnik does it exactly the other way around!

Our visitors are **installers, architects and lighting designers, building managers, business end users and government administrators**. LED + Elektrotechnik technology is only accessible to business visitors. 55% of them are **CEO's and senior management**. About 15% of the visitors will come from Belgium this year.

Worry-free participation

A maximum stand size of 100m² applies to LED + Elektrotechnik. You can use your own stand design construction or, alternatively, you can choose for our entry-level- or our luxury, all-in stand concepts against **cost price**. Arrange your participation quickly and easily via your exhibitor dashboard.

You will receive **strong digital marketing tools** to optimize the return on your participation beforehand, during and after the fair. Immediately afterwards you will receive an **extensive marketing report** with graphics display of the accumulated scan data. Learn more about this option from our sales department.

And... you will be online 365 days a year!

- with your company profile
- post unlimited news items
- upload videos
- post job offers
- upload new products

LED + Elektrotechnik by the numbers

- Takes place in november 2021
- Two days (Wednesday/Thursday)
- Min. 120 participants, 14,000 m² gross stand area
- First edition with 9,000 **exclusive professional** visitors, target 15,000 for next editions
